

DID YOU KNOW . . .

Over watering is a common homeowner mistake!

When it comes to landscape irrigation, much water is wasted. Some estimates are that lawns and landscapes are over watered by 30 to 300 percent.

Over watering not only wastes water, a valuable but limited natural resource; it is also unhealthy for landscape plants. While lawns that turn yellow tend to recover, valuable trees, shrubs and perennials are often killed by over watering.

Did you also know that NMB Water and the South Florida Water Management District (SFWMD) follows a 2-Day Water Restriction policy throughout the year?

2-Day Restriction Guidelines

No watering is permitted at any time between the hours of 10 a.m. and 4 p.m.

Wednesdays and Saturdays

ODD numbered property addresses are only allowed to water. (1, 3, 5, 7, 9)

Thursdays and Sundays

EVEN numbered property addresses are only allowed to water. (0, 2, 4, 6, 8)

Make Every Drop Count!

Reducing water usages reduces the energy required to process and deliver it to homes, businesses, and communities, which, in turn, helps to reduce pollution and conserve fuel resources.

Please help conserve water everyday!
